POLYLOK
RISER BROCHURE

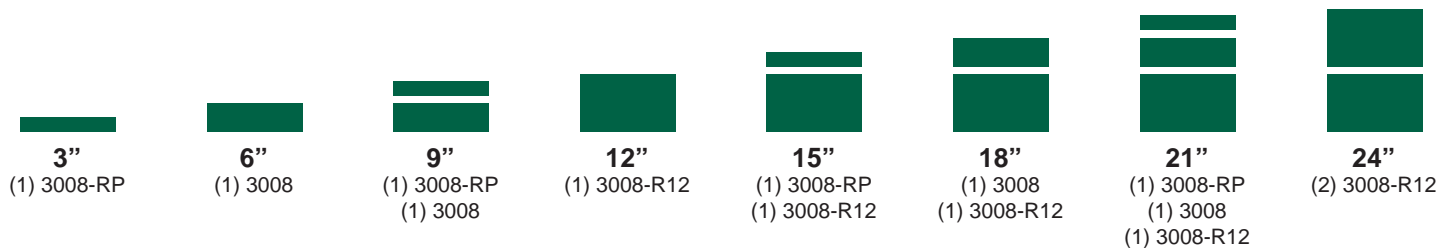

12" POLYLOK RISERS

20" POLYLOK RISERS

24" POLYLOK RISERS

⚠ CAUTION: MAXIMUM RECOMMENDED HEIGHT FOR STACKING POLYLOK RISERS IS 60". ⚠

NOTE: When adding additional riser sections use a #10 x 1.5" stainless steel screw to fasten the sections together. ALL screws must be installed in each riser section and cover to ensure a watertight connection. In addition, the structural integrity of the risers is also dependent on the fact that all screws are installed properly. We recommend an alternate screw tightening pattern be used to ensure even pressure on the risers and cover. Failure to do this could cause the riser sections to compromise the seals and possibly fail.

12" x 6" Riser
3017-R

12" ROUND RISER SERIES

Polylok's 12" x 6" riser comes with factory installed gaskets and can be placed anywhere in the riser stack. The structural ribs inside the riser and tear off ring on the outside prevent frost from adhering to the riser.

20" RISER & RISER PAN SERIES

Our 20" riser and riser pan series offers the greatest flexibility in reaching your desired stacking height. Whether it's 2 inches or 60 inches, we have the products you need. All of our Polylok risers and covers are made of high density polyethylene and are manufactured in the United States. If safety is a concern, all of our risers accept a Polylok safety screen to prevent unwanted access in the event the tank is accidentally left open. Polylok covers and grates are made with the highest UV available to prevent fading. Need a watertight solution? Our risers and covers come with factory installed gaskets. If your application calls for a cover or grate, our 20" series offers many different options, including vented and insulated covers.

20" x 2" Riser

3008

24" x 12" Riser
3008-R12

24" RISER & RISER PAN SERIES

The Polylok 24" riser family offers similar stacking flexibility to our 12" and 20" risers. You can achieve any 3" increment by pairing our 3", 6" or 12" risers to meet your specific height requirements. Our 3" riser/riser pan can be poured in place or used in the riser stack. With a focus on safety, all of our risers accept a Polylok safety screen to prevent unwanted access in the event the tank is left open. We offer a large selection of riser covers and grates to meet your desired application. Our covers are all made with the highest UV available and all of our risers and covers are manufactured in the USA.

RISER SAFETY DEVICES

Safety has become an area of focus in the wastewater industry. Many states are requiring secondary safety devices on all septic systems. Polylok has been a leader in developing these devices. Septic system companies typically suggest or use a concrete plug, but using plastic as a secondary layer of protection is also cost effective and easy to install. We offer several different styles to meet your specific needs. Riser safety screens work with our 12", 20" and 24" Polylok risers. 24" Universal Safety Screens work with PVC ribbed pipe, HDPE corrugated pipe and concrete risers. The Lid-Lok Safety Device works with our 20" and 24" riser covers. We also offer a 20" Dual Safety Cover for the 24" riser pan. These secondary safety devices can prevent tragic accidents. They are inexpensive, easy to install, and your customers will thank you!

See back cover for more information on safety devices.

Our 24" custom riser basin system is perfect for installing an effluent filter, pump or as a drainage well. They are guaranteed watertight and available in 6" height increments.

24" Cover / Grate Options

24" Polylok Riser Cover
3008-RC

24" Flat Cover for Polylok Risers & Corrugated Pipe
3008-WEST

24" Heavy Duty Cover for Polylok Risers & Corrugated Pipe

Adapter Rings & Riser to Riser Adapters

18", 20" & 24" Riser Adapter Rings

Ideal for retrofitting existing septic tanks to accept Polylok risers.

18" & 24" Corrugated Pipe Adapter Rings

Ideal for retrofitting existing septic tanks to accept corrugated pipe.

20" & 24" Riser to Riser Adapters

Allows any manufacturer's tank, riser, or corrugated pipe to be converted to Polylok risers.

Recommended Riser Safety Products

Add one of our secondary layers of protection to your riser stack in case your riser cover becomes unknowingly damaged or removed.

12", 20" & 24" Riser Safety Screens

24" Universal Safety Screen

20" & 24" Lid-Lok Safety Device

20" Dual Safety Cover for 24" Riser Pan

OUR COMMITMENT TO QUALITY, INNOVATION & CUSTOMER SERVICE

Polylok, Inc. is the world leader in providing products to the precast, drainage and onsite wastewater industries. We have a reputation for delivering cost conscious, high quality, innovative products. Polylok has been in business since 1984 and holds over 75 patents on our products. Our products are manufactured in the United States and shipped worldwide.

We pledge to always focus on quality, innovation and customer service. Since our inception, we have been driven to design, build and improve upon products for the precast, drainage and onsite wastewater industries. We have a proven track record that shows our commitment for over 30 years. Polylok continues to introduce innovative products to the market place, year after year.
